Medical Nursing Home, Nagpur, India

4th Feb. 2007 – 7th May 2008 : Resident Medical Officer

Mulik Hospital and Nursing Home, Nagpur, India

Contribution in Development of EMS in India:

Basically I born and brought in Nagpur and did my graduation from Nagpur. That time one of my senior did PGDEMS from Pune, which is first time I heard about EMS. I didn't know anything about that, but I inspired so much, that I decided to take admission and came to Pune. I was leaving in hostel.

Then first time I met with Dr. Prasad Rajhans and I decided to work with him, I motivated so much that, I decided to stop going back to Nagpur and stated working in DMH and then I didn't look back. All credit goes to sir, in fact where I am today is all because of him and his blessings.

In DMH also, I get job because of him only and also joined MEMS108 because of him. While working with MEMS I didn't had any teaching experience but I thought I might get job to work in ambulance so I took the opportunity as I was working in Emergency department in DMH. I joined MEMS as preceptor and then under the guidance of Dr. P. Rajhans sir, Dr. Shelke Sir and Dr. S. Tilekar, Dr. P. Kotwal, I become senior instructor.

I am feeling proud to tell all that, I taught the first batch of MEMS EMSO training and then it started and didn't stop yet. I taught almost hundred batches in different states of Maharashtra. At that time, I was pregnant and I remembered we did shooting for the advertisement about MEMS (Showing I am getting emergency treatment in ambulance). During my nine months of pregnancy I was fully working and travelled everywhere in different parts of Maharashtra like Gondia, Nagpur and Chandrapur district to take the EMSO trainings.

It was an exciting opportunity offered to me and got chance to become the part of the project. One more thing I would like to share that during each batch of the EMSO Trainings students appreciated teaching and felicitated me and my colleagues. This all appreciation motivated me to improve myself and with my Guru's blessings (Dr. P. Rajhans) got opportunity to come here in Dubai (to get international experience) and I am currently working as Sr. Training Manager and Clinical Educator, develop different courses related to EMS here internationally.

If any way, I am able to contribute to EMS in India this is all because of Sir (Dr. Prasad Rajhans).

I never dream about where I am today, but it's true, I am working internationally and still trying my best to contribute in EMS.

Anything you would like to say to Dr. Rajhans :

I would like to thank you him for believing on me and give me an opportunity to become a part of his dream (EMS 108). He is not only my mentor (Guru) but also I see him like my Father. Whatever achievements and positions I earn today I want to dedicate him.

Thank you sir, I salute you.
