**Anything you would like to say to Dr. Rajhans :**

A mentor with whom I, first came in contact in the year 1999, he was the one who introduced me to the world of EMS, its scenario in our country and that abroad. He urged us to take steps towards its development from the length and breadth of India, He use to say – A lone Dr. Prasad cannot bring about the change from Pune, many more hands are needed to do so.... Well he stimulated me and plenty of other young minds to take up the mission that he spear headed. A true Friend, Philosopher and Guide. Whenever one meets Dr. Rajhans, s/he receives a booster shot of 50% Glucose IV, which will fill up that individual with innumerable

ideas to work upon.

A humane side of him – When a colleague was terminally ill, he took time out to take him around to show him the ambulance call centre [That gentleman was also bit by the EMS – bug] and spend good quality time with him in absence of his family members, Sir let me put it on record that today in the materialistic world, a person who gives time unconditionally is a rare GEM. A humble person that you are will surely shrug it off.

In a hospital, Critical Care Dept of Deenanath hospital, he is a teacher to PG's, guide to juniors, an asset to colleagues, Physician to patients, and a source of solace to Relatives; If every hospital would have a clone of Dr. Rajhans talking to relatives and explaining the condition of their loved ones, no matter what is the outcome there will seldom be an argument, leave apart a mishap.

Sir, it has been a Pleasure and Honor to know you.

MEMEX 2008

First aid for Lay people

With London Ambulance Paramedic Team.

Gujarat Health Minister felicitating LIHS.

Association of Medical Consultants, HSBC and LIHS together joined hands to educate 100 Colleges in Mumbai.
