Anything you would like to say to Dr. Rajhans :

Dr. Prasad Rajhans is one of the Pioneers of EMS in India. He is the person to start PGDEMS and Key person to start Pune heart Brigade 1050 services in Pune City.

Dr. Rajhans strongly advocates development of EMS care in India. He has played a great role in development of 108 ambulance services in many states and especially in Maharashtra. Through the PGDEMS, he has helped in spreading the importance of prehospital care and created a pool of live savers.

Because of his effort, many healthcare professionals have a new career path to explore. I am one of those professional who has been benefitted by the field of EMS.
